Hi Linc and Marty,

The EPA-DC team recently requested copies of Ford's owner's guide materials in support of our request for certification on the 2011 MY 6.7L F-Series Super Duty diesels. Since you are handling the chassis-cert versions of these vehicles (test groups BFMXD06.761A and BFMXD06.771C), I wanted to make sure that you also received copies of these materials, in case they are needed for your review.

This material is also available at the following website: www.motorcraftservice.com. EPA should have a subscription to access the information on this site (my understanding is that the login and password information has been provided to Holly Pugliese). The service/workshop manuals are currently still in draft format - if you need this information to review, please let me know.

Thank you. Please let me know if you have any questions.
